

a2  
34. (Amended) The inhaler device according to Claim 33, further comprising a lifting mechanism which moves the disposable body into engagement with an opening device so as to form the outlet, the lifting device including a spindle received in an opening in the disposable body and a spindle cam mounted on the shaft, the spindle cam pressing the spindle against the disposable body during rotation of the shaft.

**REMARKS**

Claims 1- 39 are pending in the present application. Claims 30 and 34 are amended herein to place the application in better condition for examination. Favorable consideration on the merits is respectfully requested.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.

**Attachment to Preliminary Amendment dated July 31, 2002**

**Marked-up Claims 30 and 34**

30. (Amended) The inhaler device according to Claim 29, wherein the heater is mounted on a lower surface of the cover, the housing further including a lifting mechanism which moves the disposable body into engagement with an opening device so as to form the outlet.

34. (Amended) The inhaler device according to Claim 33, further comprising a lifting mechanism which moves the disposable body into engagement with an opening device so as to form the outlet, the lifting device including a spindle received in an opening in the disposable body and a spindle cam mounted on the shaft, the spindle cam pressing the spindle against the disposable body during rotation of the shaft.
